

Network Services for Enterprises and Carriers

We are a **leading ISP** focused on providing network connectivity throughout Europe, the U.S. and Asia-Pacific.

Our IP backbone spans Europe's largest PoPs (Frankfurt, Amsterdam, London, Paris, Madrid, Stockholm and Brussels), as well as the U.S. (New York, Los Angeles, Miami) and far East (Hong Kong) to serve companies in Europe, North America and APAC.

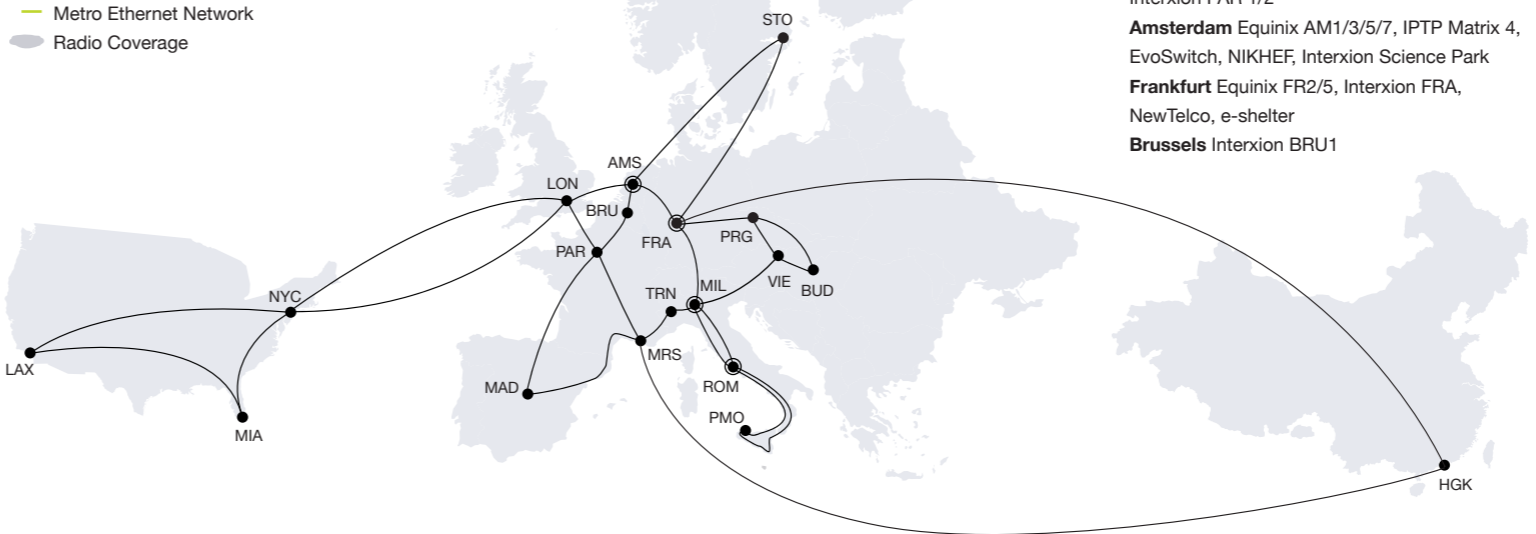

Services

- Ethernet / L2
- VPN / MPLS / SD-WAN
- Internet Access / DIA
- Cloud Interconnection

REMOTE PEERING

- POP
- MAN
- MAN + Data Center
- Partner Network
- Metro Ethernet Network
- Radio Coverage

POP LIST

- London** Telehouse North
- Paris** Telehouse 2 Voltaire, Equinix PA2/3, Interxion PAR 1/2

- New York** Digital Realty (60th Hudson st.)
- Hong Kong** Equinix HK1, MEGA-i
- Los Angeles** Coresite LA1
- Miami** Equinix MI1 (NOTA)
- Marseilles** Interxion MRS1

Neutral Interconnection Facility

Our data centers are located in the most strategic and interconnected locations in Italy:

- 2 DCs in **Milan Caldera**
- 1 DC in **Turin, Corso Svizzera**

We are carrier **neutral**, meaning we work with several networking providers to deliver connectivity that never compromises on performance, speed or availability.

Multi-carrier connectivity provides network and service independence, delivering complete choice, control and resilience for our customers.

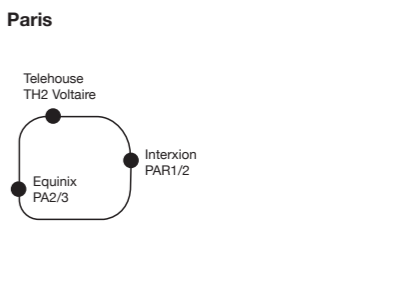

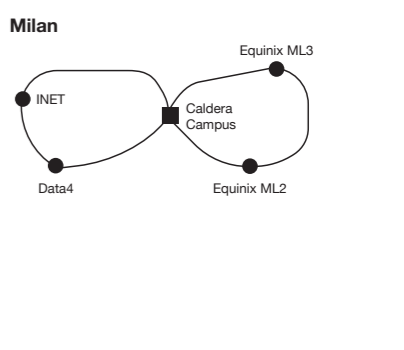

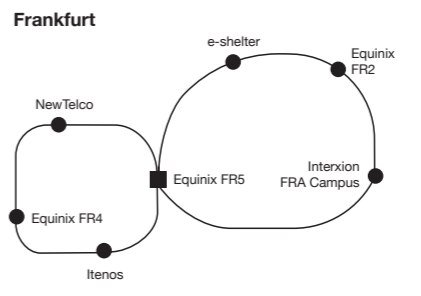

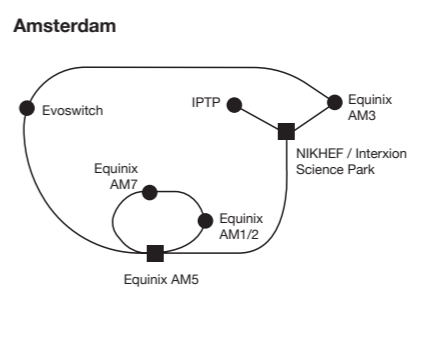

Services

- Colocation
- Hosting
- Interconnection - MMR

Cloud Infrastructure as a Service

In 2012 we developed **Enter Cloud Suite**, the first European, **OpenStack-based** cloud IaaS service. Enter Cloud Suite is trusted by several international enterprises and institutions including the European Parliament, the Digit (European Commission) and the EEA (European Environment Agency).

Services

- Computing
- Storage
- Network
- DNS
- CDN

Your journey to cloud transformation

Automium is our provider-neutral solution for building **declarative infrastructure** and deploying customers' software at any scale, all with zero lock-in deployment.

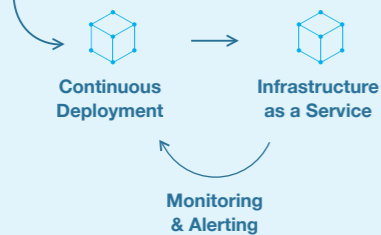

Users can take their recipes, scripts, playbooks and blueprints, and transform them into **deployment actions** and **architectural definitions**.

Whether you are setting up a new infrastructure or reengineering your existing one for the cloud, we can provide the **building blocks**.
